

BLUE100™

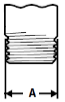

ESSENTIAL PACK BLUE100™ #8000-1000

- Life time high pressure seal, maintenance free,
- **Adjustable** rotation speed limitation, life time maintenance free
- Quick change skids $\varnothing 110$, $\varnothing 150$ mm and plastic skid included.

Designed and build in Germany- made to last

| | # |  | $\varnothing \times L$ mm |  kg |  |  |  |  |  |
|---------------|-----------|---|------------------------------|--|---|--|---|---|---|
| Blue100™ | 8000-0000 | 1" | 110 x 220 | 6.5 (7.8) | 6x M10x1 | 3x M10x1 (2x M10x1) | 1x M10x1 | 150-800 | 150 |
| Blue100™ /125 | 8025-0000 | 1 ¼" | 110 x 220 | 6.5 (7.8) | 6x M10x1 | 3x M10x1 (2x M10x1) | 1x M10x1 | 150-800 | 200 |

Multi Use Nozzle

The right tool means faster cleaning and using less water and energy.

Standard Nozzle - go around corners
remove debris

Grenade Bombe - flush bottom material out
of the pipe

Rotating Nozzle – power clean
contaminants like grease and other
stubborn residues from all around the pipe
ready for CCTV inspection

Chain scraper – removes hair roots up to 6
mm thick and this more gently than a
scraper can do

Chisel Point – the 15° front jet spirals
blockages open

Rail – change from steel to plastic and from
small to big

More adapters for a wider application soon
available

Das Siegel für Effizientes und Ökologisches reinigen.

The seal for efficient, environmentally friendly cleaning.

Le sceau pour nettoyage écologique et efficace.

Easy Use

Not having to change nozzles between
different jobs comes handy

Optimizing the nozzle with a skid change to
the pipe material or diameter is a snap with
one screw fixation

Quick-change thrust jet plate.
Change to another set up for another
vehicle or other cleaning pressure

Made of stainless steel and high strength
aviation aluminum – **made to last**

No special maintenance required with
lifetime lubrication and high pressure seal.

Any water quality, potable or recycled

Adjust the rotation speed to your needs

Maxim cleaning power with computer
calculated flow dynamics

Ceramic jets with top wear resistant's,
guarantying the same orifices shape for
years and therefore staying optimized to
the pump system

speed adjustment protected under the rail
